Resolving Indeterminate Group Tags
● Mark neutral (most conservative)
○ Mark include (least)

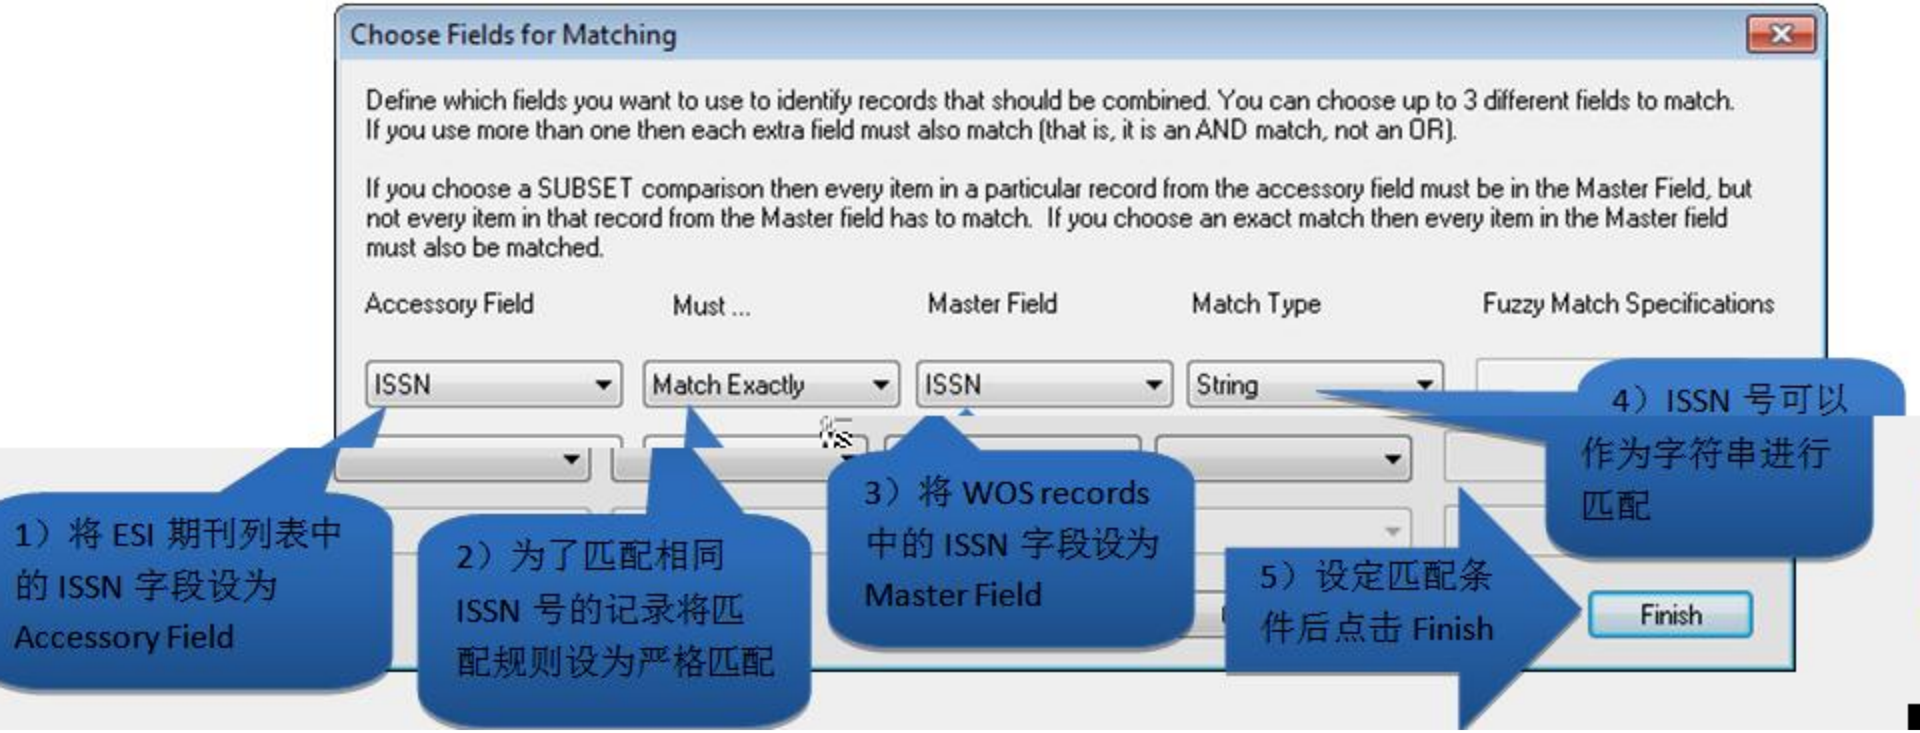
1）将 WOS records 设为 Master Dataset

2）将 ESI 期刊列表设为 Accessory Dataset

3）将两个数据集合的全部字段加入到新生成的第三个数据

4）点击 Next

THOMSON REUTERS



Choose Fields for Matching

Define which fields you want to use to identify records that should be combined. You can choose up to 3 different fields to match. If you use more than one then each extra field must also match (that is, it is an AND match, not an OR).

If you choose a SUBSET comparison then every item in a particular record from the accessory field must be in the Master Field, but not every item in that record from the Master field has to match. If you choose an exact match then every item in the Master field must also be matched.

Accessory Field	Must ...	Master Field	Match Type	Fuzzy Match Specifications
ISSN	Match Exactly	ISSN	String	

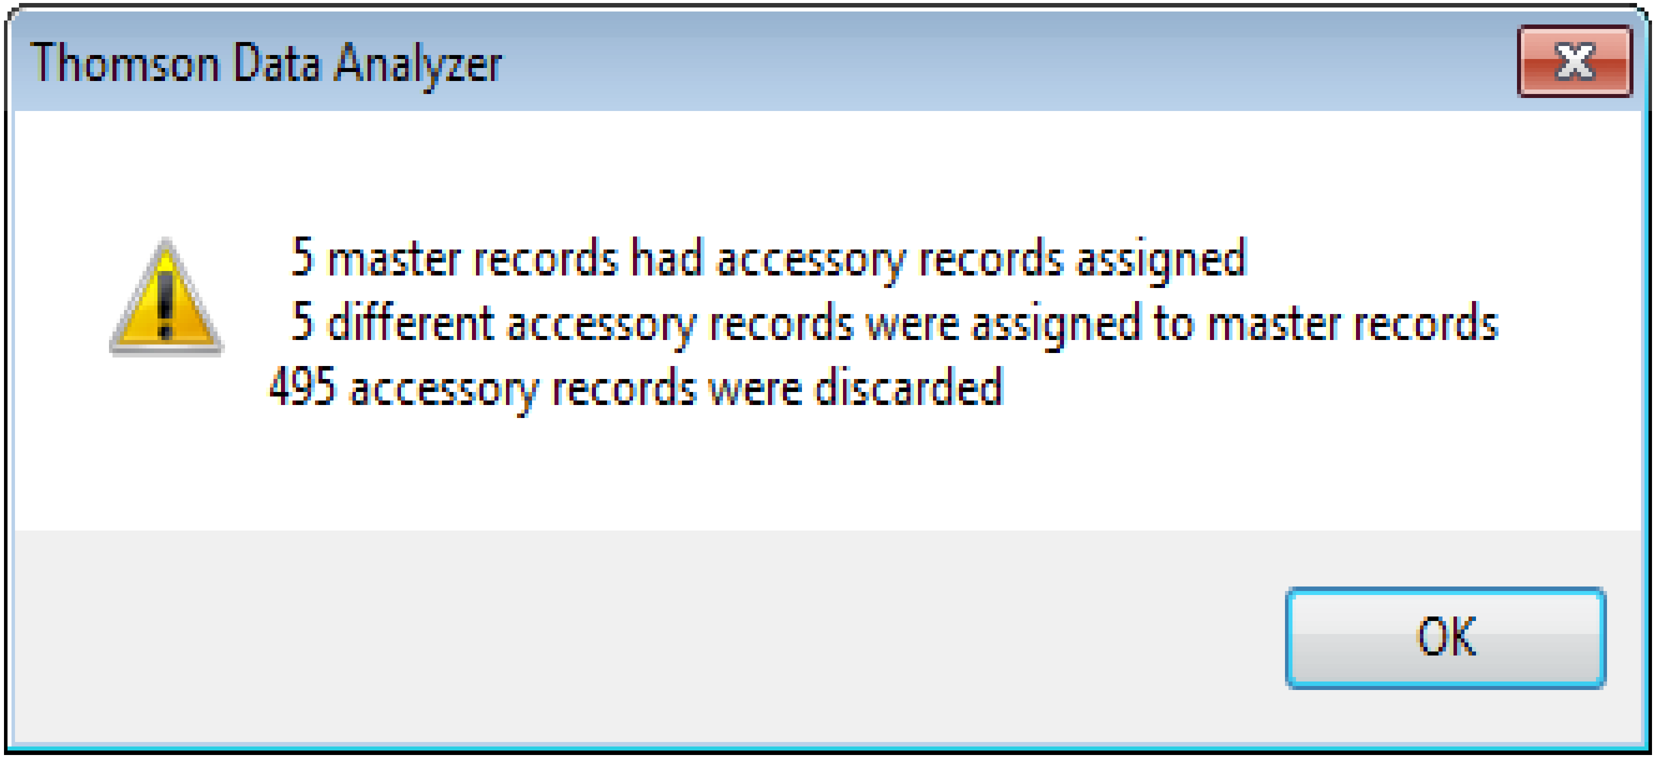
1）将 ESI 期刊列表中的 ISSN 字段设为 Accessory Field

2）为了匹配相同 ISSN 号的记录将匹配规则设为严格匹配

3）将 WOS records 中的 ISSN 字段设为 Master Field

4）ISSN 号可以作为字符串进行匹配

5）设定匹配条件后点击 Finish



Thomson Data Analyzer
OK

5 master records had accessory records assigned
5 different accessory records were assigned to master records
495 accessory records were discarded
